Subject: Covid-19 Notice - GLE Precision supports Critical Infrastructure

Dear Valued Customer,

GLE Precision continues to remain operational during the current Coronavirus (COVID-19) pandemic that is affecting businesses across the nation. During the ever-changing global response to the COVID-19, I want to assure you that GLE Precision is very focused on the safety of our employees, customers, suppliers, and community. We have adopted best practices of social distancing, frequent disinfection of our facility, strict health monitoring and travel restrictions.

GLE's Precision goods and services directly support critical infrastructure industries and are considered essential in areas such as power generation, communication, medical equipment and in military applications.

Therefore, based on our understanding of the known local, state, and federal guidelines, GLE and all of our employees are considered **Essential Business**, exempt from Shelter in Place executive orders, permitting us to maintain daily operations.

GLE Precision will continue to prepare for additional scenarios that may arise. We will continue to work with government authorities to make sure we support any new mandates and or regulations, along with providing our customers (Essential Business) partners with the products that they need. Our mission is to remain open in an effort to provide the solutions our customers need in support of critical infrastructure.

If you have any questions or concerns, please reach out to our main line (989-652-6136) and an available representative will be glad to answer any inquiries that you might have

Sincerely,

Clint Bucholz | General Manager
